

MINOR IN BIOMEDICAL SCIENCES

Angelica Kristine G. Zenarosa

For the education, in and outside the classroom, that taught me what I know.
For the people I met and the memories we share.
For the challenges that helped discover my potential and let me grow.
For showing me the world and why I should care.
For the friends and laughter that kept me sane.
For teaching me life will not always go my way.
For the breaking and making whole again.
For the person that I am today.
For all of these and much much more,
I have these past four years to be thankful for.
