Lesson #204: Life doesn't end when a thesis meets its antithesis. A shift in course, direction, and routine (among so many other factors) may initially break you, but, as always, the dust settles and you grow into things. Just when you think the old, idealistic you has gone, the synthesis comes in, and you appreciate the change you didn't think you needed nor wanted. And even then, the synthesis remains temporary and open for the cycle to repeat--maybe during a fifth year or something like that.
