

SPECIALIZATION IN DATA SCIENCE AND ANALYTICS

June N. Guerrero

She was once only June, so single as her namesake, just one of many, just another one. Now she is particularly singular and singularly particular. Now blessings are all around her, in her strong grasp of duty, in her brush of sisterly affection—so passionate and thoughtful—and in the shy sweetness of her clutch, childlike and hopeful. What a gift it is, to see her unfold into the multiform. Once upon a time, she simply was. Now, after Ateneo, she is multiple, now she is all of June. (K. Marquez)

Robert Mari Q. Ibay

Everyone was a success story. Valedictorians, editor-in-chiefs, gold medalists and the sort. You would meet actors, writers, and thinkers on a daily basis. “The top two percent,” Ambeth Ocampo jests, “who would go on to oppress the other ninety-eight.” If there’s anything, I thank the Jesuits (Fr. Dacanay & Giordano, among many) for what was a truly human education. It was not so much the Sciences alone, but the Christian foundation of Faith and Works which still lives on in Ateneo’s curriculum!
