

SPECIALIZATION IN BIOMEDICAL SCIENCES

Pauleena Katriona A. Tugonon

Before college started, Pauleena was a meek and shy girl. Throughout the past four years, she blossomed into a more confident and passionate person. From literature to science, her love seeps through and it does show in her work. Without a doubt, this love that she has will forever bring her joy and success.

SPECIALIZATION IN MICROBIOLOGY

Maria Angela O. Turiano

Ateneo, you shattered me into pieces. You made me weak and vulnerable, only to rebuild me again. You reinforced my foundations and filled in the gaps, shaping me in every aspect. Most importantly, you taught me how to love the world, our nation, others around me, and finally myself. Thank you, my dear alma mater, for overflowing me with love and gratitude, set to be a woman for others. I am ready to go down from the hill!
