

Trieldo Angelo C. Payba

“Perfection is achieved, not when there is nothing more to add, but when there is nothing left to take away.” (Antoine de Saint-Exupéry)

MINOR IN MATHEMATICAL FINANCE

Marc Angelo U. Pollentes

I started up with a such a passion with mathematics. I always thought that college will be easy and will be the same as high school. I could go through the semesters without giving that much effort. But, I was so wrong. Everything should be done with the outmost effort just to pass. My love with mathematics was mixed with hate and suffering. I was sleepless and tired almost everyday. Needless to say, it was all worth it. It was a journey that changed me drastically, preparing me for the world.
