

MINOR IN HEALTH AND DEVELOPMENT

Michelle C. Aldana

Max is the ultimate fangirl. Name her favorite band and she knows the drummer's dog. Name a series and she'll tell you what happens on-screen and behind the scenes. Anything she loves she has down to a science. With her friends, she is fiercely kind and loyal. She remembers everything. In the Ateneo, that love has flourished: in HealthSci, the OAA, as Kythe's SecGen. Soon, when she's a doctor, she won't just know everything about your life, she'll save it to boot. We're fans of her, too. (Sheng)

SPECIALIZATION IN BIOMEDICAL SCIENCES

Paolo Anton O. Alvarez

Sometimes, it hurt to be in Ateneo. Whenever I failed. Whenever I let people down. Whenever I chose to not to give the best of me to what I did because I thought it was easier that way. But sometimes, I also loved to be in Ateneo. Whenever I overcame my failures. Whenever I knew that people were there for me. Whenever I found that, in the face of adversity, I was capable of so much more than what I thought I had. Ateneo gave me pain, but it also gave me strength. And for that, I am grateful.
