The world is a playground, and wherever he finds himself, he is home. A thousand feet above sea level amidst swaying grass, underwater and passing by coral, driving along NLEX flipping cards for tonight's drinking game: all these are his natural habitats. Yet on his carefree spirit rides a skill for calculation and organization as he also dreams to one day leave a mark in the world of business – all while meandering through the river and playing the game of life. (Paolo F. Vergara)
